

## Sencha - Green Tea

Sencha 8912

Sencha 8914 Small Cut

Example: Blend with Sencha

### Product Description

Firsd Tea's sencha green tea is grown in Yiwu and Yuhang Counties in Zhejiang Province in China. Sencha is a steamed green tea, which gives it a milder taste compared to the roasted notes of pan-fired green teas (like dragonwell green tea). Chinese senchas are often used in green tea blends due to their smooth and mild character, and lower astringency. Green teas like sencha have mild caffeine levels and contain antioxidant polyphenols and l-theanine amino acids. Contains caffeine. Allergen free. Non-GMO.

### Available In

Decaf Sencha Leaf, Decaf Sencha TBC, Sencha 8907, Sencha 8911, Sencha 8912, and Sencha Fannings. Fair Trade, Kosher, Rainforest, and USDA Organic versions available.

### Used In

Sencha teas are used in popular green tea blends, like Tropical Green Blend with orange peel, papaya pieces, safflower, and natural mango flavor.
