

Young Hyson - Green Tea

Product Description

Young Hyson is a fired green tea originally produced in Anhui, Jiangxi, and Zhejiang provinces, although other countries may now produce hyson-style teas. Young hyson is considered

superior to other grades of hyson as it is harvested earlier in the season and therefore produced from a superior flush of leaf. It is known for its slightly curved, greyish green leaves. The liquor color comes out as a bright yellow. The taste of the tea should have a clean aroma with fresh and brisk character. Contains caffeine. Allergen free. Non-GMO.

Ingredient Description

Available in conventional Young Hyson #8147 and USDA Organic Young Hyson.

Preparation

3 grams tea | 8 oz water @ 210° F | 5 minutes
